

IN THE NEXT ISSUE OF **C&a**

Place your products in front of 17,000 crane, telehandler and access buyers & users who will be reading the next issue of **Cranes & Access**...

The issue will include features on:

Vertikal Days main preview

Ahead of the official show guide, we take a look at what to expect from Vertikal Days in September. With the event becoming the main platform for new product launches this year, expect to see a great new skyline of cranes, aerial work platforms and telehandlers from all the major manufacturers, plus component, software, training and other ancillary companies.

Boom Lifts

There's always plenty of new product developments with self-propelled boom lifts. In this issue we will be looking at the latest trends and changing nature of the market. Have you got any news or information to add?

Tower Cranes

The tower crane market has been one of the most dynamic crane sectors over the past year or two and that is reflected in the abundance of new products that have been launched. We report on these along with some interesting applications from around the world.

Equipment for arborists

In this annual feature we'll be tree hugging again bringing you the latest equipment updates for this expanding market for powered access and taking a look at some of the lifting and access methods used in the Canadian timber forests.

Telehandlers

Yet another fast changing market, with the emerging move towards electric, some totally new 360 degree models and so much more. If you have any telehandler news, we would love to hear from you.

Send any information, news or photographs on these subjects to editor@vertikal.net

Every issue of **C&A** is also packed with our **regular columns, news plus reader's letters, books, models, training**, along with the latest news from the **CPA, ALLMI, IPAF** and **PASMA**. Whether you are looking for local or global markets for these products you simply cannot do better than to promote your products in Cranes & Access.

Liebherr LTM 1110-5.1

The Liebherr LTM 1110-5.1 All Terrain crane was announced at Bauma 2019 and this 1:50 scale model made by Conrad of Germany has now been released. It comes with a pictorial instruction sheet and requires a few parts to be attached to the model.

The carrier chassis is detailed, and the tyres have 'Michelin' in the sidewalls. All axles steer with a very good range of movement, and all of the different steering modes can be replicated.

The carrier cab has beacon lights and very good detailing, and tiny graphics are used on the model to give an authentic appearance. There are replica rubber skirts above the wheels and the deck has multiple ladders which can be rotated and lowered to provide access. At the rear there is a very good toolbox with replica timbers stored inside.

The outriggers have graphics with individual post numbers, and they can support the model free off wheels.

The crane cab tilts and there is an extending access step also. The handrail on the superstructure can be folded for transport or raised when in service. The counterweight is accurately modelled in separate parts.

The large boom lift cylinder has a

plastic barrel and operates with a collar that rotates and clamps to lock it any required rod extension length. Each boom telescope section has graphics applied and there are metal sheaves in the boom nose. The boom sections extend smoothly and lock into place at approximately 50, 90 and 100 percent.

The bi-fold swingaway boom extension is a very nice metal lattice casting with a solid

plastic second section. It can be installed in either the base length or fully extended, and also has a ratchet for setting the offset angles at 20 or 40 degrees. The main hook block has three sheaves and a single line hook is also included.

This is a strong model which is both heavy and robust. It is very functional, and it is pleasing to see the high level of detail achieved by the addition of small graphics/decals. It would also look great in company colours. It costs €248 from the Liebherr web shop.
