MEMBERSHIP MEETINGS REVIEW

ALLMI held its annual membership meetings at the Silverstone F1 Circuit in Northamptonshire this year. The meetings attracted a good turnout with all corners of the lorry loader industry well represented.

ALLMI chief executive Tom Wakefield said: "This was yet another outstanding membership gathering for the association. Delegates were updated on a wide range of important issues and projects, and received a fascinating and in-depth presentation from Artificial Intelligence expert, Matthew Blakemore, who explained the development of AI strategies for business."

"We would like to thank all those who attended, it's always good to spend time with so many like minded peers who want to keep up to date with the latest industry activity and stay at the forefront of loader crane safety and good practice."

BOARD PRESENTATIONS

ALLMI chairman Alastair Evans presented gifts to ALLMI board members Richard Short, formerly of Penny Engineering, and Steve Frazer-Brown, formerly of David Watson Transport.

Short will be stepping down from the board in January after 12 years as a director of the association. At the same time, Frazer-Brown will be relinquishing his role as Operators' Forum chairman, having served in the position for 20 years and being the only chairman ever of the ALLMI fleet owner division.

Evans said: "It was a pleasure to give a very well deserved and public thank you to both Richard and Steve. We are extremely grateful for their many years of service to ALLMI and the lorry loader industry, and we wish them both a very happy retirement."

RECORD LEVELS & 2026 OUTLOOK

ALLMI's meetings included reports on the growing demand for its Slinger/Signaller, Crane Supervisor and Appointed Person courses, which hit record levels in the last financial year. Tom Wakefield also presented details on the association's performance, which show that it is heading for its best year ever with new member recruitment.

Members were also informed of numerous projects to look out for in 2026, including the launch of an ALLMI Benevolent Fund, the development of hydraulics training tailored for the lorry loader industry, and a new online course aimed at job site gatehouse staff.

SIM SUITE WINNERS

As part of ALLMI's event, attendees had free entry to the Silverstone museum, as well as the 'Scalextric Room', which features a recreation of Silverstone's Formula 1 Circuit. Access was also provided to the 'Sim Suite', Silverstone's racing simulator arena.

A competition was organised for the fastest Sim Suite track time. The winner of the morning session was Max Noble of D & G Noble, while the afternoon session was won by Liam Young of Palfinger UK.
