Back in Vegas

It hardly seems possible that three years have passed since the last Conexpo. I guess time flies when you are having fun!

This year feels a little different, given the global economic uncertainties and rapidly changing dynamics in the US market. Crane and, to a lesser extent, aerial lift buyers have been complaining and writing to the government about the rising cost of new cranes thanks to import tariffs, particularly on All Terrains, which are almost exclusively manufactured overseas. Even those made here use a high percentage of specialist components and steels, which also carry hefty import tariffs. The manufacturers have taken steps to mitigate or manage the situation, but that has largely been through equipment price increases. So, given that, will visitors be in a spending or a wait-and-see mood? We will soon find out.

Another thing on the radar is the number of international attendees we might expect with the last show seeing a strong uptick after the Covid Conexpo of 2020. Will overseas coverage of the US government's changes in border controls, etc., deter some of them this year? Once again, we will soon find out - let's hope not.

In the meantime, and far more importantly than all that is the show itself. The two main equipment areas for cranes and aerial lifts - the Festival and Diamond lots - are packed with the latest equipment from all over the world. At the same time, dozens of equipment, component and accessory suppliers are displaying their wares.

All too often, lifting-related visitors naturally spend almost, if not all, of their time in the main equipment display areas and run out of time to check out the latest technology and gadgets in some of the halls. We have attempted to list every exhibitor that has such items relating to the equipment we cover, filtering the lists down from more than 2,000 to just over 300, even after adding the brands that are not in the official lists and guides, because their equipment can be found on a dealer's stand.

I say this every time, but please do use this guide to plan your visit and make the most of what is a wonderful opportunity. Members of the Vertikal team are present, and we have a small booth in the new West Hall near the entrance to the Diamond Lot. Perhaps we will see you this week.

Um leistungs- und wettbewerbsfähig zu bleiben, benötigt die Industrie hochqualifizierte und ihre Märkte betreffende Informationen. Diesem Verlangen kommt *Kran & Bühne* mit praxisorientierten Artikeln nach. Mit unseren Publikationen helfen wir den Lesern, gerade bei härteren Marktbedingungen, fundierte Entscheidungen zu treffen. Die Artikel werden von einem erfahrenen, international und in Deutschland tätigen Journalistenteam verfasst. *Kran & Bühne* liefert dem Leser Neuigkeiten und Baustellenberichte. Ein wichtiger Bestandteil sind dabei harte Fakten darüber, welche Ausrüstung für welche Einsätze geeignet ist.

Abonnieren Sie jetzt einfach & bequem!

Per Fax: (07 61) 88 66 814

ACONDA - FIRST FOR INDUSTRIAL CARRIERS

ACONDA's range of Industrial Carriers are revolutionary material-handling machines designed to transform how you transport heavy or awkward loads across demanding environments. Whether you're working in construction, manufacturing, warehousing, logistics, or even event and exhibition setup, these carriers are designed to meet the unique demands of your job.

- 4 model range - capacities up to 4,000kg / 8,800lb
- Battery powered
- Fully proportional remote controls
- 45° gradeability (100%)
- Suitable for indoor and outdoor use
- Variety of accessories including cranes, dollies and glazing racks

Discover how ACONDA can elevate your material-handling capabilities and streamline your operations across any sector.

REACHING NEW HEIGHTS

**If your business wants to reach new heights,
Tadano is the right choice.**

We strive to exceed your expectations and help your business succeed with our world-leading lifting and access equipment that is renowned for reliability, efficiency, innovation and safety. Our team is standing behind you, no matter where in the world you are, to ensure that your Tadano products perform in every environment and in every situation.

With an eye on the future we are expanding our horizons, optimizing our strengths and driving green innovation. We constantly develop and evolve our products, services and solutions to add value whenever possible.

When you choose Tadano, you're taking your business to the next level and reaching new heights.

Link-Belt

Grove promises to unveil some totally new, larger All Terrain cranes, the details of which it is keeping to itself until the show opens. Whatever it is, we have it on good authority that it will be worth stopping by.

Tadano - There are so many reasons to make a stop at the Tadano stand, so make sure you have plenty of time. Even before you look at the specific products, this is not only the first time that all of the acquired brands, Manitex, Nagano, Oil & Steel, PM, Valla and Demag will appear together in North America, but it also marks the completion of the rebranding programme to Tadano. Also, if last year's Bauma is anything to go by, look out for future innovations, new concepts and more.

Link-Belt is in an almost unique situation in that it is the only company manufacturing All Terrains in the USA. This will be the first Conexpo for the 200 tonne/225

ton 225 | AT unveiled in 2024. Avid model collectors will be happy to learn that two new scale models will be on the stand, the 300 | AT All Terrain and the 120 | HT truck crane.

Franna, the fast travel pick & carry crane from Australia, is a blend of All Terrain and Rough Terrain in one unit, handy for full service crane rental companies. You will find the MCT 25 on the Terex Materials stand in the Silver Lot.

Liebherr always puts on a good exhibition, although it is being a tad coy on what it will show, but we do know that it will unveil an all new All Terrain crane, along with other mobiles, with a focus on optimised transportation, new, more advanced assistance and setup systems.

XCMG - The Chinese company is making inroads internationally, and building a market with its hybrid and even all electric cranes - definitely worth a stop.

Liebherr LTM 1055-3.3

Tadano 25EL

ON THE JOB!

TEEC 800

75 mt Telescopic Crawler Crane

- Remarkable control, reliability and capacity performance
- Full power boom with attachment flexibility
- Quick mobilization & superb job-site mobility
- Ergonomically designed for maximum visibility, comfort and control

Link-Belt CRANES

Contact your local dealer for more information.

Find us on: Link-Belt Cranes

Lexington, Kentucky, USA | www.linkbelt.com

Zoomlion - Another of the big three Chinese crane manufacturers, Zoomlion will have a selection of its mobile cranes on show, including traditional truck cranes, All Terrains and Rough Terrains... although with such a wide selection of construction equipment, stand space will be at a premium.

Sany - You never know what to expect with Sany, globally it is making an impact with its Rough Terrains and will probably show an RT, truck crane and possibly an All Terrain crane.

Terex Cranes - Rough Terrain cranes are now part of Italian tower crane manufacturer Raimondi. Conexpo is its first outing, so expect to be wowed! It will show its latest Rough Terrain cranes, but more importantly, this is Middle East owned Raimondi's first move into the mobile crane market - expect more.

Dutch spider and pick & carry crane maker **Hoeflon** will be on the **UPEquip** stand, while on the smaller end of the market, they are definitely worth a look.

The same applies to archival **Jekko** from Italy on the **Fascan** stand - beautiful engineering, well executed.

Broderson - A classic name in the carry deck market they can be found on the **Lanco** stand, almost certainly alongside a few other

mobile crane exhibits.

Altec is appearing for the first time at Conexpo since its acquisition programme got underway, expect to see its latest truck crane and boom trucks on the stand. Lots going on with Altec, so don't miss it.

Elliott - Interesting times at the truck crane and boom truck manufacturer. In December it was acquired by mechanics truck and service crane manufacturer Stellar Industries. It is possible the two companies will be celebrating the deal's completion at the show.

Smiley Lifting Solutions - It sells a range of small pick & carry cranes and a few boom trucks - interesting products worth a look.

Finally, don't forget the articulated loader crane producers, many of which

can be found in the Diamond Lot, such as **Cormach**, which focuses on the heavier end of the market. It has a unique geometry with a wide open elevating base and offers a

strong alternative to regular small to mid-size truck cranes for many applications. Others include **Fassi** on the **Fascan** stand, **Palfinger** and Turkish manufacturer **World Power**.

Link-Belt Cranes will unveil the new 248 | V, the fifth generation of its 200 ton/181 tonne lattice boom crawler crane, at the show. The updated model features a new luffing jib remote controlled upper counterweight installation. Also, check the new telescopic.

Manitowoc is not revealing anything but is making a lot of noise about innovative new products. Will it include crawler cranes? Also check the Sennebogen-built Grove telescopes.

Tadano will have both telescopic and lattice crawlers on show - it says to expect more evolution than revolution. It will have the 400 tonne/440 ton CC24.400-1 lattice crane on the stand alongside its TC600 telescopic.

Liebherr has not mentioned crawler cranes, but it is hard to imagine that it will not have at least one mid-range model on show, as well as a telescopic.

Kobelco will have two of its lattice crawlers on display, but we are not sure which.

PVE Cranes is definitely a stand worth visiting. Based in the Netherlands, PVE rents cranes worldwide, but also manufactures rugged lattice crawler cranes with electric or diesel power. It will launch a new generation crane, the 200 tonne PVE American CC200.

Expect to see a telescopic crawler on the **Sany** stand, and possibly its new 200 tonne SCC2000A-EV electric lattice crawler.

XCMG will have an array of 35 machines on its stand, from excavators to wheel loaders and aerial work platforms. Whether there is space left for a crawler crane, who knows?

Hoeflon builds an interesting range of high tech, lightweight spider cranes and is gaining a significant following in Europe. If you are interested in smaller tracked cranes, then this stand is a must, as is the **Fascaan** stand, to see Jekko's latest models and also check out the controls and displays.

But if spider cranes are your thing its hard to beat the Japanese

Liebherr LRB 19

Unic

Tadano GTC-600

cranes from **Maeda**, and on the **Spydercrane** stand **Unic**. They may not have some of the 'bells and whistles' of the Europeans, but they are easy to operate and just about bulletproof when it comes to reliability.

Finally, **SPT** is the leading Chinese spider crane manufacturer. Don't expect high tech, but price might well be a thing?

Montarent - Manitowoc Stand	F39029		

While Conexpo might not have the depth of tower crane exhibits we see at Bauma, there are some interesting exhibits and introductions and there is still plenty to see.

In terms of what's going on, an interesting stand will be **Terex**

Cranes by Raimondi. This is the first outing for the Terex cranes since it was acquired by Raimondi at the start of November. It is kicking off with the new 16 tonne CTT 392-16 flat-top tower crane with up to 75 metres of jib and a wide choice of towers. Sounds interesting. It will also show the CTL 702-32/712-45 luffer.

Raimondi has come a long way since KBW Holding acquired the company in 2014, and has big plans for the combined business, so worth stopping by for a chat.

Spanish manufacturer **Jaso** celebrated its 50th anniversary last year and is now focusing heavily on new technology. One thing to look out for is its all new Horizon crane cab, launched last year and now in production.

Liebherr has chosen to show a self-erecting tower crane from its new K series - the 91 K - with its intelligent assistance system that, the company says, enhances precision, efficiency, and safety. It will be running live demonstrations, so see what you think.

On the **Manitowoc** stand, you will find the **Potain** line of tower cranes, as you might expect, but also it will show the Dutch built **Montarent** 4x4 wheeled chassis under a self-erecting Potain crane. The product has apparently sold well in North America - it is definitely worth a look.

Comansa will exhibit its new five tonne 6LC85 flat-top compact tower crane for urban job

sites with jib lengths to 52.5 metres with a 1.2 tonne jib tip capacity.

As for the Chinese manufacturers, given all their other products it is unlikely that we will see their tower cranes, but we might be surprised. **Sany, XCMG** and **Zoomlion** are all located in the Festival Lot so it will not be hard to spot any that do.

Promote and enable the safe, effective use of powered access worldwide

TIME TO UPSKILL?

IPAF offers more than 40 training courses for different machine categories including mobile elevating work platforms (**MEWP**), mast climbing work platforms (**MCWP**) and construction hoists (**CH**).

Whether you're a site manager, health & safety professional, engineer, planner, specialist, experienced operator, or absolute beginner, IPAF has a course for you.

IPAF training helps keep employees safe and employers legally compliant, while the globally recognized IPAF PAL Card proves operators have been trained to the highest standard.

Many courses can be taken solely or partly online as eLearning, in a matter of hours, providing flexibility to fit training in easily around your schedule.

OVER 3 MILLION PAL CARDS HAVE BEEN ISSUED WORLDWIDE

March 3-7 2026 | Las Vegas, NV
BOOTH: GL31205

IPAF to showcase Safety, Training and Innovation

IPAF, the International Powered Access Federation, can be found on a stand in the Grand Lobby area of the exhibition centre. This year, its focus will be on the importance of training before using or working with aerial work platforms or mast climbing work platforms, in order to help ensure safety and efficiency. Although it welcomes all visitors who have an interest in working at height.

IPAF experts will be on hand to highlight a range of initiatives designed to help contractors, rental companies, supervisors and operators improve productivity while reducing risks on jobsites in North America. Visitors to the stand can benefit from actionable guidance, practical tools, and training resources that can be applied in everyday aerial lift operations.

IPAF's core themes for the show include:

- eLearning: Accessible, Affordable and A92.24-Compliant Training. Attendees can learn more about IPAF's enhanced training curriculum, which supports ANSI/SAIA A92.24 requirements and is designed to remove traditional barriers to training.

- Roadways Safety Campaign: IPAF North America's latest safety campaign is titled 'How to Stay Safe on or Near Roadways', aimed at reducing the growing number of vehicle related incidents involving aerial work platforms.

- Digital Innovation: IPAF will deliver live demonstrations of its ePAL app, which provides digital PAL Cards, operator logbooks, training records, and access to safety guidance. The app is designed to help companies streamline training verification, improve record-keeping, and ensure that only trained operators are using platforms on site.

- Advancing Safe Aerial Work Platform Use Together: IPAF will also engage with attendees interested in joining IPAF North America and becoming part of a growing community committed to advancing safe and effective platform use across the industry.

IPAF North America regional manager Tony Groat said: "I am looking forward to hosting a seminar at the event on March 5th entitled 'Smart

MEWP Selection: The Accessories That Take Safety Further'. It's not just about picking the right lift, it's about equipping it for safety and efficiency. After selecting the correct platform, one must focus on the many accessories and options available in today's market, many of which can influence or even change your final equipment choice."

"Safety and productivity are not opposites - they are partners"

"The message I hope attendees take away from Conexpo 2026 is simple: safety and productivity are not opposites, they are partners. I hope people leave with a stronger understanding of how to select the right MEWP and the knowledge and tools needed to complete work safely and efficiently."

IPAF invites all attendees to visit our booth - GL31205 in the Grand Lobby - to connect with the

IPAF team, explore training and safety resources, and learn how IPAF continues to support safer, more productive powered access operations across the industry.

IPAF is a not for profit organisation owned by its members, which include manufacturers, rental companies, distributors, contractors and all manner of powered access users. IPAF has members in more than 80 countries, and members include the majority of the worldwide aerial rental fleet operators and manufacturers who produce more than 85 percent of all of the platforms on the market.

GOUWEELEEUW

The power of perfection

www.gouweleeuw.com/en

No project too big or too heavy!

Gouweleeuw: The paint shop for vertical transport!

About Gouweleeuw

Specialized in painting:

- Mobile cranes
- Excavators
- Crawler cranes
- Aerial platforms
- Tower cranes
- Other heavy equipment

We work daily on assignments for leading manufacturers such as:

- Tadano
- Liebherr
- Sany
- Manitowoc
- Kobelco
- Spierings

But of course we also work for importers, dealers and end users (both new and used equipment) such as:

- Global Crane Services
- Kavanagh Crane Hire Ltd.
- Allelys Installations Ltd.
- Osprey Marine Ltd.
- DM Cranes Ltd.
- Stoddart Crane Hire Ltd.
- G. O'Brien Crane Hire Ltd.
- Foster Crane & Equipment Ltd.

Transport service

Have you bought a crane in Europe? First have the crane sprayed in your corporate colours at Gouweleeuw!

If desired, we can take care of the transport of the crane. We arrange international transport as well as transport from the port to Gouweleeuw and back.

Genie Integrated Access Deck

As usual, there is plenty to see when it comes to self-propelled aerial work platforms, and this year is no exception in terms of booms and scissor lifts. One question is which manufacturer will have the largest boom lift at the show? You can be pretty certain that it will be one of three candidates - **Zoomlion**, **XCMG** or **Snorkel**. We do know that **Snorkel** will have its 210ft 2100SJ straight telescopic, which offers a working height of almost 66 metres. It broke the big boom record when it appeared as a prototype at Conexpo 2020. Six years on and with a few units in the field, the company is looking for wider take up.

Dingli has a big stand which will be packed. Check out the big boom lifts, with their modular construction and a choice of diesel, battery electric or hybrid power packs. When it comes to scissor lifts, if you have not already seen and tried the 'No Oil' models, then do so - the technology is now state of the art, at least for slab electric scissor lifts.

MEC is promising some radical surprise products but check the 135ft 135-RJ telescopic unveiled last year with its articulated rotating jib.

Skyjack's display will include the new 32ft slab electric scissor lift with direct electric drive, as well as the new 45ft SJ5545 E, its largest slab electric and the 40ft SJ6940 RT compact Rough Terrain scissor. You might ask about the new 85ft all electric Rough Terrain telescopic boom lift, the SJ28 TE+, for China and Southeast Asia.

At **JLG** check out the new 26ft micro scissor lift - the ES2632M - and its new generation of boom lifts. It will also stage live demonstrations of autonomous robotics and connectivity each hour.

As **Genie** enters its 60th year, it will focus on accessories and safety equipment, including 'Lift Guard', 'Zone Lighting', 'Lanyard alert' and 'Integrated Access Deck' on a 19ft GS-1932m micro scissor providing 19in/500mm of extra height for false ceilings etc...

Skyjack SJ28 TE+

Manitou will highlight its new scissor lifts and the 85ft telescopic boom lift, the company also has some interesting user accessories.

Sinoboom should have its new 15ft battery electric 0407ET oil-free scissor lift on the stand, which is well worth a look.

LGMG will launch a new 125ft T125J-2 telescopic, the ANSI/CSA version of the upgraded T38J-2 as well as an 18ft SS1932ER micro scissor lift.

Finally, don't miss **Hyrax**, a small Dutch company, which builds high quality self-levelling tracked boom lifts. Stop by and watch a demo.

Leguan

Altec Teupen TC89TJplus

CMC 75i

We start with Altec. It is almost two years since it acquired German spider lift manufacturer Teupen and a year since the surprise launch of an all-new 72 metre (238ft) truck mounted lift designed in Germany.

At Conexpo, it will focus on the AC40E-152S, a 40ton/36 tonne truck crane, the 68m/225ft truck mounted lift, as well as the 127ft/38.6m Altec Teupen TL127AJplus spider lift with 400kg/882lbs platform capacity and the unusual looking 89ft/27m TC89AJplus.

Another company undergoing change is Time which is exhibiting as Ruthmann. It will show the 73m/243ft T-243A on a five axle chassis. It will also show a 19.6m/65ft Bluelift 65B spider lift.

But don't miss Anderson Underbridge, which will show its two most popular models - the HP35 and the HPT66 - but possibly more interesting it will demonstrate an immersive Virtual Reality display of underbridge work.

Making its Conexpo debut Easy Lift will show its 21m/69ft RA21 or 67-33AJ, as its distributor Upequip has dubbed it. Alongside will be the 31m/101ft RA31 - the 101-48AJ in

Ruthmann T243 A

the USA, which will be available for demonstrations.

Leguan is yet another company 'on a roll', it doubled its revenues last year and increased US sales by 50 percent. It will highlight the new 27m/88ft Leguan 265, designed with tree work in mind, the live demo is worth a look.

The USA is one of Platform Baskets' largest markets for its spider lifts, but it also leads the market with road rail boom lifts.

CMC is another Italian spider lift company with a strong presence in North America. Now private equity owned it will show the 20m/65ft/65L Contractor Pro, the 23m/75ft 75i Utility Pro, which will be displayed on 'Lift Carrier Pro' specially modified truck for easy loading, unloading and transport. Finally, the largest unit on

the stand is the 100ft/30m 100HD Arbor Pro.

Socage/Raptor Socage is yet another company on the up, having acquired major competitor CTE last year and took full control of its Indian JV this year. It will launch North American versions of its truck mounted/bucket lifts while promoting its Raptor spider lifts, with the 24m/80ft Raptor 80S on the stand.

Oil&Steel, the Italian truck mounted and spider lift manufacturer, is now fully integrated into Tadano, at least in terms of branding. On the stand will be the 21m/68ft Oil&Steel Octopus 21, which becomes the Tadano AL68, at least for North America.

Palazzani, yet another Italian spider lift maker and another company

Elliott

Palazzani TZJ 590

Tadano

expanding, will show the 18m/59ft TZJ 590 launched last year as the TZJ 180, part of its new generation articulated models. Also look for the 25m/82ft TSJ 82 and 33m/108ft TZ108.

Elliott is now owned by Stellar Industries, an employee owned business, but the two had already booked separate stands. Elliot has not been specific about its exhibits.

SET-UP AREAS**

TC89AJplus

NEW TO CONEXPO: ALTEC TEUPEN EQUIPMENT

For the first time at ConExpo, Altec will exhibit Altec Teupen equipment. Attendees can visit Altec at booth F44042 to see the Altec Teupen TL127AJplus, a spider lift that features a 127-foot articulating and telescopic boom and an 882-pound platform capacity. This unit offers rapid point to point access for the most difficult to reach applications. The Altec Teupen TC89AJplus will also be displayed. This spider lift represents the next generation of standard features for future Altec Teupen models. It features an 89-foot articulating and telescopic boom with a newly designed high performance boom system that provides smooth boom operation and stability aloft.

Xtreme XR7038

LGMG

Sinoboom

Telehandlers are well represented this year, with a good combination of North American and European manufacturers, along with new entrants from China.

For those who might not be in the know, the North American market tends to prefer a high boom, more rugged and basic product when it comes to medium to large, fixed frame models. These are now bracketed by European-style compact models and big 360 degree telehandlers. Add to this a couple of new quad track machines, and there is plenty to see for those interested in this type of machine.

In 2023, **Xtreme Manufacturing** dazzled with the monster 50,000lbs/100ft (22,500kg/30.5m)

Trackzilla XR50100-G quad track machine with 16.6 metres/55ft of forward reach. This year it will show two Trackzillas alongside the ultra heavy duty 70,000lb/38ft (31,500kg/11.5m) XR7038-F, plus its first all-electric model, the 40,000lb/30ft (18 tonne/9m) XR4030-E.

Staying with quad tracks, **JLG** will show a more mainstream 10,000lbs/43ft (4,500kg/13.2 metre) 1043T, while Xtreme's Trackzillas are in production JLG says its new machine is a concept model, and is therefore looking for your input and feedback.

Magni is a stand not to miss, the company has a habit of surprise unveilings of new record-breaking

models at the show. This year it has at least four chunky new models - two 8,000kg/17,500lb capacity 360 degree units, the 35m/115ft RTH 8.35 and 39m/129ft RTH 8.39TC. In terms of fixed frame models, it has launched two 4,000kg/8,800lb units, the 15 metre/50ft TH4.15TC and 19m/63ft.

Sennebogen has not confirmed whether it will display one of its heavy duty telehandlers or not, but it is worth a look just in case.

Sinoboom has big plans for the telehandler market and has been working on both fixed frame and 360 degree models, the fruits of which it will have on display.

Skyjack has not said which models it will have on its Conexpo stand apart from the 10,000lb/56ft (4,500kg/17m) SJ1056TH, but look out for its compact North American SJ519 TH.

LGMG is another Chinese aerial lift manufacturer looking to gain a foothold in the telehandler market. It will show the new 12,000lb/56ft (5,400kg/17m) H1256 with 42ft/12.7m of

forward reach. It might also have its new 69ft /11,000lb (5,000kg/21m) 360 degree HR2150 on show.

In 2023, **Sany** showed a full range of its North American telehandlers which were built in China and with plans to start production in Germany. It will be interesting to see where it is building them now. There should certainly be plenty to see.

At recent exhibitions, **Bobcat** has displayed innovative new tech, and may well do so here in the USA, so worth walking by for a look.

Manitou will exhibit its latest products, but for many, it will also be the first opportunity to meet the company's new president for North America, Brad Boehler, in his new role.

While the big equipment stands are impressive, there is probably more to be learnt from touring the Technology booths and checking out the latest ideas etc...

It is also a good chance to shop around for new tire and accessory suppliers while seeing what the latest outrigger mat and ground protection bods have to offer.

ALIMATS®

Aluminium Handleable Interlocking Outrigger Mat System

- Worldwide distribution
- Option to purchase
- 24-hour hire delivery service anywhere in the UK
- Solutions for cranes and powered access
- Quotes within the hour
- Free technical support

Interlocking modules are easier to set up and enables greater structural performance

All mat modules are handleable for two people to offload and position

Mat sizes from 1.34m² to 8.07m² for hire and sale

Trusted by some of the biggest construction and crane hire companies

REACH THE WORLD THAT **LIFTS** THE WORLD.

Crane Hub Global connects the global crane, lifting, and heavy transport industry across every continent.

Crane **Hub**

GLOBAL REACH. REAL RESULTS.

2.8 MILLION+

Industry Impressions (YTD)

725.000+

Professional Clicks & Interactions

200K+

Global Audience

With 100% organic growth and a verified global audience, Crane Hub Global delivers unmatched exposure to:

- Crane Owners
- Operators
- Fleet Managers
- OEMs
- Heavy Lift & Transport Decision-Makers

Across North America, LATAM, Europe, Asia, Africa & the Middle East.

We don't just publish content.

We drive visibility, influence, and measurable results.
