Leguan

Altec Teupen TC89TJplus

CMC 75i

We start with Altec. It is almost two years since it acquired German spider lift manufacturer Teupen and a year since the surprise launch of an all-new 72 metre (238ft) truck mounted lift designed in Germany.

At Conexpo, it will focus on the AC40E-152S, a 40ton/36 tonne truck crane, the 68m/225ft truck mounted lift, as well as the 127ft/38.6m Altec Teupen TL127AJplus spider lift with 400kg/882lbs platform capacity and the unusual looking 89ft/27m TC89AJplus.

Another company undergoing change is Time which is exhibiting as Ruthmann. It will show the 73m/243ft T-243A on a five axle chassis. It will also show a 19.6m/65ft Bluelift 65B spider lift.

But don't miss Anderson Underbridge, which will show its two most popular models - the HP35 and the HPT66 - but possibly more interesting it will demonstrate an immersive Virtual Reality display of underbridge work.

Making its Conexpo debut Easy Lift will show its 21m/69ft RA21 or 67-33AJ, as its distributor UPequip has dubbed it. Alongside will be the 31m/101ft RA31 - the 101-48AJ in

Ruthmann T243 A

the USA, which will be available for demonstrations.

Leguan is yet another company 'on a roll', it doubled its revenues last year and increased US sales by 50 percent. It will highlight the new 27m/88ft Leguan 265, designed with tree work in mind, the live demo is worth a look.

The USA is one of Platform Baskets' largest markets for its spider lifts, but it also leads the market with road rail boom lifts.

CMC is another Italian spider lift company with a strong presence in North America. Now private equity owned it will show the 20m/65ft/65L Contractor Pro, the 23m/75ft 75i Utility Pro, which will be displayed on 'Lift Carrier Pro' specially modified truck for easy loading, unloading and transport. Finally, the largest unit on

the stand is the 100ft/30m 100HD Arbor Pro.

Socage/Raptor Socage is yet another company on the up, having acquired major competitor CTE last year and took full control of its Indian JV this year. It will launch North American versions of its truck mounted/bucket lifts while promoting its Raptor spider lifts, with the 24m/80ft Raptor 80S on the stand.

Oil&Steel, the Italian truck mounted and spider lift manufacturer, is now fully integrated into Tadano, at least in terms of branding. On the stand will be the 21m/68ft Oil&Steel Octopus 21, which becomes the Tadano AL68, at least for North America.

Palazzani, yet another Italian spider lift maker and another company

Elliott

Palazzani TZJ 590

Tadano

expanding, will show the 18m/59ft TZJ 590 launched last year as the TZJ 180, part of its new generation articulated models. Also look for the 25m/82ft TSJ 82 and 33m/108ft TZ108.

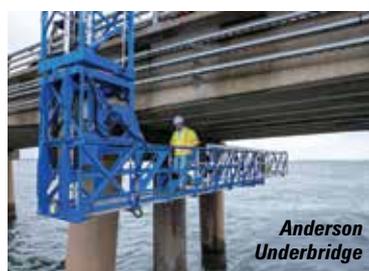

Elliott is now owned by Stellar Industries, an employee owned business, but the two had already booked separate stands. Elliot has not been specific about its exhibits.
